BENEFITS OF TRACK LIGHTING

1. Versatile Application

Track lights can be used to illuminate every space from a dark hallway to an office, to a cozy living room, or highlight beautiful artwork and family photos. There is no specific function or place for track lighting; with endless applications, they're an easy choice for any room in your home.

2. Non-Invasive Installation

One of the biggest benefits of track lighting is its easy installation. If you are using tracks to replace an existing light fixture, no complex installations or new electrical boxes are required. This simple upgrade allows you to increase the light in your room dramatically without difficult electrical work or cutting into your ceiling.

3. Simple to Adjust

Track lighting allows you to make a number of quick and easy changes to your lighting environment. For instance, if you redecorate and move your centerpiece dining room table, you can also adjust your track heads along the length of the track to better illuminate your new setup.

4. Perfect for LED Bulbs

When it comes to selecting bulbs for your track fixture, LEDs are your best option. Lighting experts strongly recommended using LED bulbs with track lights because they are available in various beam spreads, lumens, sizes, and color temperatures. LED bulbs are most important when highlighting artwork because their low heat output will prevent damage to valued art.

Lasting up to 50,000 hours with 70 percent savings in energy cost, LED bulbs are the future of lighting. Switch to LED bulbs for a long-lasting light source that will save you money without compromising on light-output or style.

5. The Best Size for Every Home

Tracks are available in lengths of 2, 4, 6, and 8 feet and can be connected or cut to create any length. To further accommodate the needs of your home, track heads are produced in a wide range of sizes. For lower ceilings, it is best to opt for a sleek, small track head, and for high or vaulted ceilings, large, powerful track heads are recommended

6. Customizable Style

With so many varieties of track lights, from minimalist to eccentric, you're certain to find a style that fits your personal taste. Contrary to preconceptions, track lighting does not have to be clunky, outdated spotlights or industrial tracks often seen in retail locations. The vast selection of track lighting options includes sleek track heads and pendants that are easy to incorporate into any home.
